EDUCATION

- University of Cambridge** | *Bachelor of Arts in Computer Science* 2015 - 2018
- Achieved First-Class Honours with distinction in systems programming and distributed computing
 - Led university coding competition team to regional finals, mentoring 12 junior developers
- ETH Zurich** | *Master of Science in Computer Science* 2018 - 2020
- Specialized in Human-Computer Interaction and Frontend Architecture with 4.0 GPA
 - Published research paper on accessibility patterns in modern web applications with 200+ citations

EXPERIENCE

- Figma** | *Senior Frontend Engineer* 2022 - Present
- Architected and deployed new collaborative canvas rendering engine, improving performance by 45% and reducing latency from 250ms to 120ms for 2M+ daily active users
 - Led frontend refactoring initiative across 8 feature teams, reducing bundle size by 32% (1.2MB saved) and improving Lighthouse scores from 78 to 94
 - Mentored 4 junior engineers on React best practices and performance optimization, contributing to 100% promotion rate within 18 months
- Stripe** | *Staff Frontend Engineer* 2020 - 2022
- Redesigned payment forms component library, increasing form completion rates by 28% and generating \$2.1M in additional annual payment volume
 - Implemented real-time validation system using WebSockets and RxJS, reducing transaction processing errors by 67% across 50K+ merchant partners
 - Established comprehensive frontend testing standards achieving 89% code coverage and reducing production bugs by 41%
- Cloudflare** | *Senior Frontend Engineer* 2018 - 2020
- Built real-time analytics dashboard processing 100B+ requests daily using Vue.js and Canvas APIs, adopted by 95% of enterprise customers
 - Optimized critical rendering path reducing initial page load time by 56% (3.2s to 1.4s) through code splitting and service worker caching strategies
 - Spearheaded accessibility initiative, achieving WCAG 2.1 AA compliance across 40 products and increasing accessible user base by 18%
- Notion** | *Frontend Engineer* 2016 - 2018
- Developed real-time collaborative editing components in TypeScript, supporting 500K concurrent users with zero data loss
 - Reduced app initialization time by 62% through lazy loading and progressive enhancement, improving mobile conversion by 23%
 - Implemented comprehensive design system with 150+ reusable components, reducing development time across teams by 40%

PROJECTS

- FlowSync** | *React, TypeScript, WebRTC, Redis, Node.js* 2023 - Present
- Built real-time collaborative whiteboarding SaaS with WebRTC peer connections supporting 1000+ simultaneous collaborators with 99.7% uptime
 - Implemented differential synchronization algorithm reducing bandwidth usage by 74% while maintaining sub-100ms latency across 50 countries
- PixelPerfect** | *Vue.js, Canvas API, WebGL, Electron* 2021 - 2022
- Created cross-platform image editing desktop app acquiring 50K+ downloads with 4.8-star rating and 95% retention rate
 - Optimized WebGL rendering pipeline achieving 60fps performance on mid-range devices, expanding addressable market by 320%
- a11y-Scout** | *React, Puppeteer, Axe DevTools, Node.js, GraphQL* 2022
- Developed open-source accessibility auditing tool with 800+ GitHub stars used by 2K+ organizations for automated WCAG compliance testing
 - Engineered headless browser testing pipeline detecting 95% of accessibility violations automatically, reducing manual audit time by 70%

EXTRACURRICULAR

- React Advanced Patterns Conference** | *Speaker & Workshop Facilitator* 2022 - Present

- Delivered annual talks on frontend performance optimization reaching 1200+ developers with average 4.7/5 satisfaction rating
- Conducted hands-on workshops teaching concurrent rendering and Suspense patterns to 300+ engineers across FAANG companies

Open Source Mentorship Program | *Senior Mentor*

2020 - Present

- Guided 8 early-career developers in contributing to high-impact open-source projects with cumulative 12K+ GitHub stars
- Facilitated code reviews and architecture discussions resulting in 15+ merged pull requests and mentee placement in senior roles

TECHNICAL SKILLS

Languages – JavaScript, TypeScript, Python, GraphQL, SQL

Technologies – React, Vue.js, Next.js, Electron, WebRTC, Canvas API, WebGL, Redux, RxJS, Node.js, Express

Tools – Webpack, Vite, Jest, Cypress, Figma, Chrome DevTools, Lighthouse, Docker, Git, AWS CloudFront, DataDog APM
