EDUCATION

- University of Cambridge** | *BA in Computer Science*2021 - 2024
 - Achieved First-Class honors with distinction in full-stack web development coursework, ranking top 8% in cohort
 - Led 12-person capstone project team building a distributed task scheduling system, delivering 3 weeks ahead of deadline
- University of Melbourne** | *Graduate Diploma in Information Technology*2020 - 2021
 - Completed accelerated program with 92% average, specializing in cloud architecture and microservices
 - Presented research paper on containerization optimization at tech symposium, attracting 150+ attendees

EXPERIENCE

- Shopify** | *Junior Full Stack Engineer*June 2024 - Present
 - Built and deployed 4 customer-facing REST APIs using Node.js and PostgreSQL, processing 500K+ daily transactions with 99.7% uptime
 - Reduced critical bug resolution time by 65% through implementing automated regression test suite covering 87% of codebase
 - Collaborated with product and design teams to ship 3 major feature releases, each reaching 40K+ active users within first month
- Datadog** | *Software Engineer Intern - Full Stack*January 2024 - May 2024
 - Developed React dashboard component library with 22 reusable components, reducing frontend development time by 48% across 8 teams
 - Optimized MongoDB query performance by refactoring 15 aggregation pipelines, decreasing average latency from 850ms to 180ms (79% improvement)
 - Mentored 2 new interns on full-stack best practices, resulting in 3 merged pull requests and production deployment of their features
- Figma (Creator Fund)** | *Full Stack Contractor*September 2023 - December 2023
 - Engineered plugin API wrapper library in TypeScript, enabling 25+ third-party developers to integrate with Figma platform
 - Implemented real-time collaboration features using WebSockets and Redis, reducing state sync latency by 71%
 - Achieved 94% code coverage on critical authentication modules through comprehensive unit and integration testing strategy

PROJECTS

- ByteFlow - Real-time Code Collaboration Platform** | *React, Node.js, WebSocket, MongoDB, Docker, AWS EC2*April 2024 - June 2024
 - Built end-to-end collaborative code editor supporting 50+ concurrent users with sub-200ms latency using operational transformation algorithm
 - Implemented syntax highlighting for 15+ programming languages and achieved 92% test coverage across 3,200+ lines of critical code
- DataViz Analytics - Open Source Data Dashboard** | *Vue.js, Python Flask, PostgreSQL, D3.js, GitHub Actions*August 2023 - December 2023
 - Created modular analytics dashboard with 18 unique chart types, accumulating 2.8K GitHub stars and 340+ contributors
 - Optimized data rendering pipeline, reducing dashboard load time by 56% and enabling visualization of 1M+ data points
- CloudSync - Smart File Synchronization Service** | *Go, gRPC, Kubernetes, PostgreSQL, React, S3*January 2024 - March 2024
 - Engineered distributed file sync engine handling 10K+ files/minute across 5 cloud providers with 99.5% consistency guarantee
 - Reduced infrastructure costs by 42% through intelligent sharding and edge caching strategies
- AuthShield - Enterprise Authentication Library** | *TypeScript, Express.js, JWT, OAuth2, Redis*June 2023 - September 2023
 - Developed enterprise-grade authentication library with multi-factor authentication, supporting 8 identity providers and 150K+ monthly users
 - Published on npm registry with 18K+ weekly downloads and maintained 95% documentation coverage
- TaskMaster API - High-Performance Task Queue** | *Rust, Tokio, RabbitMQ, PostgreSQL, Prometheus*November 2023 - January 2024
 - Built ultra-fast task processing system handling 100K+ jobs/hour with 99.99% delivery guarantee
 - Achieved 3.2x performance improvement over Node.js baseline, processing tasks in <5ms average latency

EXTRACURRICULAR

JavaScript Community UK - London Chapter | *Co-organizer & Speaker* March 2023 - Present

- Organized 8 monthly meetups attracting 180+ JavaScript developers, growing community membership by 340%
- Delivered talk on 'Building Scalable Node.js Architectures' to 120+ attendees, generating 8.5/10 average feedback score

Open Source Contributions | *Active Maintainer* January 2023 - Present

- Contributed 47 pull requests to major open-source projects (React, Express.js, Playwright), achieving 89% merge rate
- Maintained personal open-source library with 1.2K GitHub stars, resolving 94% of issues within 48 hours

TECHNICAL SKILLS

Languages – JavaScript, TypeScript, Python, Go, SQL, HTML5, CSS3

Technologies – React, Node.js, Vue.js, Express.js, PostgreSQL, MongoDB, Redis, Docker, Kubernetes, AWS (EC2, S3, Lambda), GraphQL, REST APIs, WebSocket

Tools – Git, GitHub, GitLab, VS Code, Docker, Postman, Jest, Vitest, webpack, npm, yarn, CI/CD (GitHub Actions, GitLab CI), Linux, Vercel, Heroku
