

Peak Ruiz

+1 (415) 287-3641 | Email: peak.ruiz@gmail.com | LinkedIn: peak-ruiz | GitHub: PeakRuiz | <https://peakruiz.dev>

EDUCATION

- University of Michigan** | *B.S. in Computer Science* 2018 - 2022
- Led capstone project on real-time data pipeline optimization, achieving 40% latency reduction across systems
 - Active member of Michigan Hackers and competed in HackMichigan 2021, winning Best Full Stack Application award
- Coursera & Udacity** | *Deep Learning Specialization & Full Stack Nanodegree* 2022 - 2023
- Completed advanced courses in cloud architecture and microservices design on AWS and Google Cloud
 - Earned credentials in React, Node.js, and PostgreSQL with distinction

EXPERIENCE

- Stripe** | *Full Stack Engineer* January 2023 - Present
- Architected and shipped a new payment reconciliation dashboard reducing manual reconciliation time by 65%, saving Operations team 120 hours monthly
 - Optimized critical database queries using PostgreSQL indexing strategies and caching, improving API response times by 48% for 50M+ monthly transactions
 - Led migration of legacy REST endpoints to GraphQL, enabling 12 client teams to reduce network requests by 35% and improve user experience
- Figma** | *Senior Software Engineer (Full Stack)* June 2022 - December 2022
- Developed collaborative real-time editing features using WebSockets and Operational Transformation, serving 500K+ concurrent users with 99.97% uptime
 - Refactored React component library, reducing bundle size by 42% and improving time-to-interactive metric from 3.2s to 1.8s
 - Implemented comprehensive monitoring and alerting system that reduced incident detection time from 45 minutes to 5 minutes
- Datadog** | *Software Engineer* August 2021 - May 2022
- Built distributed trace analysis service handling 2 billion traces daily, enabling 150+ enterprise customers to debug production issues 3x faster
 - Developed internal CLI tool in Go that automated deployment workflows, reducing release cycle time by 58% across 8 engineering teams
 - Designed and implemented event streaming pipeline using Kafka and Node.js microservices, processing 500K events per second with zero data loss

PROJECTS

- StreamSync Analytics** | *React, Node.js, PostgreSQL, Redis, AWS Lambda* March 2023 - July 2023
- Built real-time analytics dashboard for monitoring SaaS metrics, processing 100K+ events/second with sub-100ms latency using Redis caching
 - Achieved 94% test coverage with Jest and Cypress, reducing production bugs by 72% compared to previous implementations
- DebugFlow - Open Source DevTools** | *TypeScript, React, Electron, Node.js, Chrome DevTools Protocol* October 2022 - February 2023
- Designed debugging tool for full-stack JavaScript applications with 2.8K GitHub stars, attracting 150+ monthly active contributors
 - Optimized DevTools extension to reduce memory overhead by 64%, enabling inspection of applications with 5GB+ of state
- AsyncFlow Job Queue** | *Python, FastAPI, RabbitMQ, SQLAlchemy, Docker* May 2022 - September 2022
- Published distributed job queue library enabling asynchronous task processing with automatic retry logic, reducing failed job rates by 89%
 - Documented API with 200+ code examples and tutorials, achieving 15K+ monthly downloads on PyPI
- CloudVault - Encrypted Cloud Storage** | *Next.js, TypeScript, Prisma, PostgreSQL, AWS S3, TweetNaCl* December 2021 - April 2022
- Engineered end-to-end encrypted cloud storage application supporting 1GB+ files with client-side encryption, achieving zero-knowledge architecture
 - Implemented efficient chunked upload system reducing upload time by 76% for large files through parallel processing

EXTRACURRICULAR

- Tech Community - Full Stack Mentorship Program** | *Technical Mentor & Speaker* 2022 - Present

- Mentored 12 junior developers transitioning into full-stack roles, with 100% of mentees securing engineering positions within 6 months
- Delivered 5 technical talks at major conferences (React Conf, NodeConf, PyCon US) on distributed systems and performance optimization, reaching 8,000+ engineers

Open Source Contributors Circle | *Core Contributor & Maintainer*

2021 - Present

- Contributed 340+ commits to popular open-source projects including Next.js, tRPC, and Prisma with 28 accepted PRs improving codebase quality
- Organized monthly virtual hackathons for junior engineers, growing community from 200 to 2,800+ active participants

TECHNICAL SKILLS

Languages – JavaScript, TypeScript, Python, Go, SQL, HTML/CSS

Technologies – React, Next.js, Node.js, Express, FastAPI, PostgreSQL, MongoDB, Redis, GraphQL, REST APIs, WebSockets, Microservices, Docker, Kubernetes

Tools – Git, Docker, Kubernetes, AWS (EC2, RDS, Lambda, S3), Google Cloud Platform, GitHub, GitLab, Jira, VS Code, Postman, DataDog, New Relic
