EDUCATION

Imperial College London | *BSc Computer Science with Distinction* 2018-2021

- Achieved 3.89/4.0 GPA with First-class honors; awarded the Anglo-German Scholarship for academic excellence in human-computer interaction
- Led the Imperial Web Development Society (150+ members), organizing weekly design system workshops and mentoring 8 junior developers in component-driven architecture

ETH Zurich | *MSc Computer Science (Systems Track) with Summa Cum Laude* 2021-2023

- 3.95/4.0 cumulative GPA; thesis on 'Performance Optimizations in Token-Based Design Systems' published in ACM CHI workshop proceedings
- Teaching assistant for UI Engineering seminar across 2 semesters; mentored cohort of 45 students with 94% positive feedback rating

EXPERIENCE

Figma | *Senior Frontend Engineer, Design Systems* 2023-Present

- Architected and shipped the Components v2 system supporting 40+ primitive component types and 500+ compound variants; reduced bundle size by 28% (from 340KB to 245KB gzip) and decreased time-to-interactive by 340ms across 12M+ monthly active users
- Led design system adoption initiative across 8 product teams (120+ engineers), achieving 87% component reuse rate (+34% YoY); implemented automated accessibility auditing reducing WCAG violations by 91% (from 2.3K to 210 issues)
- Designed and open-sourced component API surface and tooling; contributed Storybook integration reducing setup time from 4 hours to 12 minutes; library fork rate grew 2,100+ GitHub stars in 8 months

Stripe | *Frontend Engineer II, Platform Design* 2022-2023

- Built token-driven theming engine supporting 15+ dark/light mode variants and RTL layouts; eliminated 47KB dead CSS and reduced theme application latency by 56ms (measured at p95) across 8 merchant dashboards serving 500K+ businesses
- Implemented comprehensive Storybook documentation for 220+ reusable components with interactive props panels; improved design-to-dev handoff velocity by 6.2 days per sprint for team of 9; component discovery metrics showed 73% increased reuse
- Shipped CSS-in-JS migration (styled-components → vanilla-extract) across 12 feature modules; improved build times by 2.1 minutes (18% reduction) and reduced runtime style computation overhead by 43%; zero breaking changes across 800+ component consumers

Cloudflare | *Frontend Engineer, Developer Experience* 2021-2022

- Led cross-team UI component library standardization initiative; consolidated 340 duplicate components into unified 85-component system; achieved 76% code deduplication and 2.3MB bundle savings across 15+ internal dashboards
- Developed TypeScript-first component API with runtime prop validation and compile-time type checking; reduced component-related bugs by 64% (from 18 monthly incidents to 6.5) and improved developer experience NPS from 34 to 71
- Mentored cohort of 4 junior frontend engineers on design systems fundamentals and component composition patterns; 100% of mentees promoted or received significant project ownership within 12 months

Wise (formerly TransferWise) | *Frontend Engineer, UI Patterns* 2020-2021

- Built foundational design system documentation site using Gatsby and MDX supporting 12 design tokens categories with live code examples; improved onboarding time for new frontend hires by 4.8 days and reduced design-dev sync meetings by 62%

- Implemented automated visual regression testing suite with Percy integration across 180 components; caught 43 unintended style regressions pre-production and achieved 100% test coverage on design system core module
- Shipped responsive grid system and layout primitives supporting 6 breakpoints; powered redesign of 8 product surfaces with 31% improvement in mobile user engagement and 12% reduction in mobile interaction latency

PROJECTS

TokenForge | *TypeScript, Node.js, GraphQL, Figma Plugin API* 2023-Present

- Open-source design token generation and synchronization tool bridging Figma tokens to code (CSS, SCSS, JSON); 890 GitHub stars, 45K+ npm downloads/month, adopted by 20+ companies including 2 Series-B funded startups
- Implemented bidirectional token sync engine with conflict resolution; plugin reduces token extraction workflow from 2.5 hours to 8 minutes; analyzed performance showed 94% reduction in manual token management overhead for design teams

Chromatic | *React, CSS Modules, Webpack 5, Jest, Storybook 7.0* 2022-2023

- Comprehensive accessible React component library for typography-heavy applications; 12.3K GitHub stars, featured in Awesome React list; 127K npm downloads across 3-month span with 4.9/5.0 rating
- Engineered automated accessibility compliance suite catching WCAG 2.1 AA violations; all 56 components ship with axe-core audits and manual testing docs; zero accessibility issues reported in production across 2 years

DesignOps Dashboard | *Next.js 13, TailwindCSS, Prisma, PostgreSQL, Vercel* 2021-2022

- Full-stack metrics platform tracking design system adoption KPIs and component usage analytics; 156 GitHub stars, 3.2K unique monthly visitors; powers internal Figma design metrics at previous employer
- Optimized dashboard queries reducing page load P95 latency from 3.4s to 680ms (80% improvement); implemented serverless functions handling 2.1M monthly metric ingestion events with \$127/month AWS cost

TypeScale Generator | *React, Web Workers, Canvas API, Vite* 2020-2021

- Interactive tool for generating typographic scales based on mathematical ratios; 2,847 GitHub stars, 89K+ total visits, widely shared in design systems community; featured in CSS-Tricks and Smashing Magazine
- Implemented Web Worker-based rendering engine processing 12,000+ scale variations in <200ms; optimized memory usage by 73% through lazy-loaded canvas rendering

EXTRACURRICULAR

Design Systems Conference (DSConf) | *Speaker & Steering Committee Member* 2022-Present

- Keynote speaker at DSConf 2023 ('Scaling Design Systems for 500+ Engineers'); presentation reached 3,200+ live attendees and 14.7K views on YouTube within 6 weeks; post-event feedback 4.7/5.0 stars (n=687)
- Steering committee member curating talks and workshops; led selection process for 28 talks from 156 submissions; coordinated 12-month speaker mentorship program elevating 6 emerging voices in design systems community

Open Source Maintainer, Storybook Project | *Core Contributor & Design Systems Champion* 2021-Present

- Merged 87+ pull requests and triaged 2,300+ issues across 3 years; maintained design systems documentation resulting in 48% reduction in support questions on Storybook discussions; 1.2M+ total GitHub stars for Storybook ecosystem
- Established 'Design Systems Addon' initiative shipping 4 major feature releases; adoption by 28% of Storybook user base (estimated 340K+ monthly active projects); mentored 7 contributors to maintainer status

TECHNICAL SKILLS

Languages – TypeScript, JavaScript (ES2023+), HTML5, CSS3/SCSS, GraphQL, SQL

Technologies – React 18+, Next.js, Storybook 7+, Figma, CSS-in-JS (styled-components, vanilla-extract), Web Components, Vite, Webpack 5, Node.js, Web Accessibility (WCAG 2.1 AA/AAA)

Tools – Git, GitHub, Figma, VS Code, Playwright, Jest, Vitest, Percy, Chromatic, Chrome DevTools, Lighthouse, Axe DevTools, Datadog, Sentry, ESLint, Prettier
