EDUCATION

University of Cambridge | *Bachelor of Arts in Computer Science* 2021-2024

- Achieved First Class Honours with 89% average in core CS modules including Algorithms, Distributed Systems, and Machine Learning
- Led university coding club with 150+ active members, organizing weekly workshops and 4 annual hackathons

Georgia Institute of Technology | *Summer Research Exchange - Full Stack Development* June 2023 - August 2023

- Completed intensive 12-week program building scalable web applications with mentorship from senior engineers
- Contributed to 3 open-source projects with 25+ merged pull requests across distributed repositories

EXPERIENCE

Stripe | *Software Engineer Intern* June 2023 - September 2023

- Developed and deployed 4 new payment processing features in TypeScript, reducing transaction latency by 18% for 50,000+ merchants
- Built comprehensive unit and integration test suite achieving 92% code coverage, preventing 12+ production bugs
- Optimized database queries using indexed lookups and query refactoring, improving API response time by 340ms (24% improvement)

Datadog | *Junior Software Engineer* September 2023 - Present

- Engineered real-time monitoring dashboard component in React that processes 2M+ data points daily, serving 15,000 enterprise customers
- Reduced cold start latency of Lambda functions by 42% through performance profiling and code optimization across 8 services
- Delivered 6 bug fixes and feature improvements in first quarter, achieving 98% uptime on assigned microservices handling 500K requests/hour

TechStartup Labs | *Full Stack Developer (Contract)* January 2024 - March 2024

- Architected and shipped full-stack e-commerce platform using Node.js and React, generating \$125K in first month revenue
- Implemented JWT-based authentication system processing 50K+ daily active users with 99.95% uptime
- Collaborated with 3 cross-functional team members to deliver MVP 2 weeks ahead of schedule, resulting in Series A funding of \$2.5M

PROJECTS

CloudSync Pro | *Python, FastAPI, PostgreSQL, Docker, AWS S3* October 2023 - December 2023

- Built intelligent file synchronization tool that syncs 10,000+ files 60% faster than competitors through delta compression algorithms
- Achieved 4.8-star rating on GitHub with 340+ stars and 2,100+ downloads across npm and PyPI

NeuroFlow Analytics | *JavaScript, D3.js, Node.js, MongoDB, WebSocket* July 2023 - September 2023

- Developed real-time data visualization platform processing 50K events/second with sub-100ms latency using WebSocket streaming
- Generated 12 enterprise leads through product showcase, resulting in \$45K ARR from SMB customers

CodeReview AI | *Python, TensorFlow, FastAPI, GitHub API, Hugging Face* April 2024 - Present

- Created AI-powered code review assistant reducing review time by 35% for development teams through automated pattern recognition
- Integrated with 8 major git platforms, supporting 500+ developers across 40 organizations

LocalGather | *React Native, Firebase, Google Maps API, Redux* November 2023 - January 2024

- Engineered mobile social discovery app connecting 3,200+ users within 3 months of launch in London market
- Optimized app performance reducing bundle size by 45%, improving Android startup time from 4.2s to 2.3s

MetricsFlow | *Go, Prometheus, Grafana, InfluxDB, Docker Compose* February 2024 - March 2024

- Built distributed metrics collection framework handling 1M+ data points/minute with 99.9% reliability
- Achieved 89% memory efficiency improvement through custom time-series compression, reducing infrastructure costs by \$8K/month

EXTRACURRICULAR

Hack the Burgh | *Technical Organizer & Mentor* 2023 - Present

- Organized annual hackathon attracting 400+ developers, securing £50K in sponsorships from 12 tech companies
- Mentored 25+ junior developers on full-stack development, contributing to 8 award-winning projects at events

Open Source Contributions | *Active Contributor* 2023 - Present

- Contributed 45+ pull requests to 15+ repositories including TensorFlow, Kubernetes, and Next.js with 98% merge acceptance rate
- Recognized as top contributor in Q4 2023, achieving 120+ GitHub followers and 5.2K+ profile stars

TECHNICAL SKILLS

Languages – Python, JavaScript/TypeScript, Go, Java, SQL, HTML/CSS

Technologies – React, Node.js, FastAPI, React Native, Firebase, PostgreSQL, MongoDB, Docker, Kubernetes, AWS (S3, Lambda, EC2), GCP

Tools – Git, GitHub, VS Code, Postman, Figma, Jira, DataDog, Prometheus, Grafana, Linux/Unix
