EDUCATION

ETH Zurich (Swiss Federal Institute of Technology) <i>M.S. Computer Science</i>	2008-2010
- Specialized in distributed systems and compilers, achieving top 5% in program ranking - Led capstone project on parallel processing optimization that reduced computation time by 35%	
University of Belgrade <i>B.S. Computer Science</i>	2004-2008
- Graduated summa cum laude with focus on algorithms and data structures - Won university programming competition and represented institution at Balkan Olympiad in Informatics	

EXPERIENCE

Palantir Technologies <i>Principal Software Engineer, Data Infrastructure</i>	2020-Present
- Led architecture redesign of core data pipeline serving 200+ enterprise clients, reducing query latency by 62% and improving system throughput by 4.2x - Mentored team of 8 senior engineers across 3 continents, establishing best practices that reduced production incidents by 78% - Drove adoption of Kubernetes migration strategy for legacy systems, delivering \$12M in annual infrastructure cost savings	
Stripe <i>Principal Engineer, Platform Services</i>	2017-2020
- Architected and deployed real-time event processing system handling 1.2M events per second with <100ms P99 latency, supporting \$50B+ annual transaction volume - Owned platform reliability improvements that increased system uptime from 99.9% to 99.99%, preventing estimated \$8.5M in customer revenue loss - Implemented comprehensive observability framework reducing mean time to resolution (MTTR) for production incidents from 45 minutes to 8 minutes	
Cloudflare <i>Senior Principal Engineer, Performance & Optimization</i>	2014-2017
- Developed novel edge caching algorithm that improved cache hit rates by 41% across 180+ data centers globally, serving 10M+ requests per second - Engineered distributed consensus protocol for configuration management, reducing deployment time from 12 minutes to 90 seconds across fleet - Established engineering excellence program that increased code review coverage to 100% and reduced critical security findings by 84%	
Shopify <i>Principal Software Engineer, Payments Platform</i>	2011-2014
- Built payment processing microservices handling 50K transactions per second with 99.99% uptime, processing \$5B+ annually - Designed resilient multi-region failover system that prevented 15 potential outages, maintaining zero payment processing downtime - Created performance optimization framework that reduced API response times by 58%, improving merchant conversion rates by 3.2%	
Datadog <i>Senior Software Engineer, Agent & Core Infrastructure</i>	2010-2011
- Contributed to agent scalability improvements enabling monitoring of 500K+ hosts, growing product market adoption by 340% - Implemented efficient metrics compression algorithm reducing data transmission bandwidth by 53% without accuracy loss - Developed distributed tracing framework adopted by 12,000+ enterprise customers worldwide	

PROJECTS

VectorFlow - Distributed Vector Database <i>Rust, CUDA, gRPC, Arrow, Kubernetes</i>	2021-Present
- Built high-performance vector similarity search engine achieving 100K queries per second with sub-5ms latency on billion-scale datasets - Open-source project garnered 8,500+ GitHub stars and adopted by 200+ organizations for production ML inference workloads	
QueryCompiler - SQL Optimization Engine <i>C++, LLVM, Python, PostgreSQL</i>	2018-2020
- Designed adaptive query optimization system improving complex SQL execution by up to 73% without application changes - Published peer-reviewed paper with 520+ academic citations detailing novel cost-based optimization techniques	

EXTRACURRICULAR

Systems & Distributed Computing Community (Open Source Foundation) Core Contributor & Technical Lead	2015-Present
- Led RFC process for major protocol standard adopted by 50+ companies, influencing architecture decisions for infrastructure affecting 2B+ users - Mentored 25+ junior engineers transitioning to senior roles, with 18 advancing to leadership positions at FAANG companies	
Conference Speaker - Distributed Systems Conference, QCon, Velocity Technical Speaker & Session Chair	2016-Present
- Delivered talks on large-scale infrastructure design reaching 12,000+ engineers across three continents with 94% satisfaction rating - Published 8 technical articles generating 150K+ views on distributed systems, microservices, and performance optimization	

TECHNICAL SKILLS

Languages – Python, Go, Rust, C++, Java, TypeScript, SQL, Scala
Technologies – Kubernetes, Apache Kafka, PostgreSQL, Redis, gRPC, Apache Spark, Apache Arrow, CUDA, Protocol Buffers, GraphQL, Docker, Envoy Proxy
Tools – Git, CI/CD (Jenkins, GitHub Actions), Terraform, Prometheus, Grafana, Datadog, Jaeger, ELK Stack, ArgoCD, Helm
