EDUCATION

University of Waterloo | *Bachelor of Computer Science, Honours Co-op* 2020 - 2024

- Achieved 3.8/4.0 GPA and received Dean's Honours List recognition for three consecutive years
- Led web development track in campus coding competition, mentoring 12 first-year students on React fundamentals

University of Toronto | *Summer Bridge Program - Advanced Web Technologies* June 2022 - August 2022

- Completed intensive 12-week full-stack bootcamp with focus on modern frontend frameworks and TypeScript

EXPERIENCE

Stripe | *Frontend Engineer Intern* May 2023 - August 2023

- Refactored payment form components reducing bundle size by 23% through tree-shaking optimization and lazy loading
- Implemented real-time validation UI for merchant dashboard, decreasing form submission errors by 18% across 50K+ daily active users
- Collaborated with design team to migrate 8 legacy components to new Stripe Design System, improving accessibility score from 72 to 94

Notion | *Junior Frontend Developer* September 2023 - Present

- Developed interactive table filtering feature used by 2.3M+ workspace members, increasing engagement time by 12%
- Optimized React component rendering performance through memoization and virtualization, reducing initial page load time by 31%
- Led A/B testing initiative for dark mode UI variant, achieving 64% user adoption within 6 weeks

Figma | *Frontend Engineering Co-op* January 2022 - April 2022

- Built WebSocket-based real-time collaboration indicator component handling concurrent updates from 50+ simultaneous users with <100ms latency
- Reduced CSS-in-JS runtime overhead by 27% through static extraction and CSS module conversion across design panel modules
- Debugged and fixed critical SVG rendering bug affecting 8% of canvas interactions, preventing 15K+ daily frustration incidents

PROJECTS

PixelFlow | *React, TypeScript, Tailwind CSS, Firebase* March 2023 - June 2023

- Built collaborative image editing web app with real-time layer synchronization across 5 simultaneous editors, achieving 99.2% uptime
- Implemented WebGL-based image filters reducing processing time by 68% compared to canvas-based solution

CodeSnap | *Next.js, Prisma, PostgreSQL, Vercel* July 2022 - October 2022

- Created code snippet management platform with syntax highlighting, attracting 340+ GitHub stars and 12K monthly visitors
- Optimized database queries reducing average page load time from 1.8s to 420ms through strategic indexing and caching

VoiceChat Dashboard | *Vue.js, WebRTC, Node.js, Socket.io* November 2022 - February 2023

- Engineered real-time audio/video call metrics dashboard handling 500+ concurrent peer connections with 94% accuracy in latency reporting
- Decreased dashboard load time by 45% implementing virtual scrolling for metrics tables containing 50K+ data points

OpenUI Components Library | *React, Storybook, TypeScript, npm* August 2021 - Present

- Contributed 18 accessible UI components to open-source library, accumulating 2,100+ npm weekly downloads
- Improved component test coverage from 56% to 89%, reducing production bugs by 34% in dependent projects

PerformanceMonitor Browser Extension | *JavaScript (Vanilla), Chrome Extension API, D3.js* May 2021 - August 2021

- Developed Chrome extension providing real-time Core Web Vitals visualization for 1,200+ active users
- Achieved 4.7/5.0 rating on Chrome Web Store with 89% positive reviews

EXTRACURRICULAR

Frontend Masters Study Group | *Co-Organizer & Mentor* January 2022 - Present

- Organized bi-weekly study sessions on advanced React patterns for 35+ members, creating comprehensive learning materials covering hooks and state management
- Mentored 8 junior developers transitioning into tech roles, with 6 successfully landing frontend internships within 6 months

React Toronto Meetup & HackTO Conference | *Speaker & Volunteer* March 2023

- Delivered 45-minute technical talk on 'Performance Optimization in Large-Scale React Applications' to 120+ developers, receiving 4.8/5.0 average feedback score

- Volunteered as frontend track mentor at HackTO 2023, guiding 24 participants to build 6 production-ready projects

TECHNICAL SKILLS

Languages – JavaScript, TypeScript, HTML5, CSS3, SQL

Technologies – React, Next.js, Vue.js, Redux, Zustand, Tailwind CSS, Material-UI, Styled Components, Jest, React Testing Library, GraphQL, REST APIs, WebRTC, Socket.io

Tools – Git, GitHub, Webpack, Vite, Chrome DevTools, VS Code, Figma, Storybook, JIRA, Vercel, Netlify, Firebase, PostgreSQL
