EDUCATION

University of Washington | B.S. Computer Science

2010 - 2014

EXPERIENCE

Stripe | Staff DevOps Engineer

Jan 2021 - Present

- Architected and deployed multi-region Kubernetes infrastructure serving 400+ microservices, reducing latency by 34% and improving availability to 99.99% SLA across production environments
- Led cross-functional platform engineering team of 6 engineers, establishing IaC standards and mentoring 3 junior engineers on infrastructure design patterns, resulting in 45% faster onboarding time
- Designed and implemented automated disaster recovery solution using Terraform and custom Go orchestration tools, reducing mean recovery time from 8 hours to 12 minutes for critical payment processing systems

Shopify | Senior DevOps Engineer

Jun 2018 - Dec 2020

- Migrated 200+ services from EC2 to containerized ECS architecture, reducing infrastructure costs by \$2.1M annually while improving deployment frequency from weekly to 50+ daily releases
- Implemented GitOps workflow using ArgoCD across 12 development teams, automating 95% of manual deployment processes and reducing production incident response time by 60%
- Built comprehensive observability platform integrating Prometheus, Grafana, and ELK Stack for 15K+ monitoring endpoints, enabling real-time alerting and reducing MTTR by 40 minutes on average

Databricks | Lead Infrastructure Engineer

Mar 2016 - May 2018

- Designed and operationalized multi-cloud strategy supporting AWS, GCP, and Azure, enabling 3 new enterprise customer deployments and generating \$8M incremental ARR
- Established infrastructure-as-code standards using Terraform and Ansible, reducing manual configuration drift incidents by 89% and cutting infrastructure provisioning time from 4 weeks to 3 days
- Mentored team of 4 engineers on Kubernetes architecture and networking, facilitating 12 internal knowledge-sharing sessions that improved team velocity and reduced critical incident resolution time by 35%

Airbnb | Senior Platform Engineer

Jul 2014 - Feb 2016

- Championed containerization initiative, containerizing 80 legacy monolithic applications using Docker, reducing deployment time from 2 hours to 8 minutes and improving service reliability by 28%
- Designed distributed configuration management system using Consul and custom Python tooling, serving 500+ service instances and eliminating 73% of configuration-related production incidents
- Owned platform security hardening initiative, implementing HashiCorp Vault for secrets management across infrastructure, achieving zero unauthorized access incidents across 200+ production workloads

PROJECTS

Multi-Tenancy Kubernetes Platform Architecture | Kubernetes, Helm, Istio, Prometheus, Terraform

2022 - 2023

- Architected isolated multi-tenancy model supporting 25+ independent customers with complete resource isolation and billing metering, generating design patterns adopted company-wide
- Implemented advanced networking and observability using Istio service mesh, reducing inter-service latency by 22% and achieving 99.95% SLA across all customer environments

EXTRACURRICULAR

Cloud Native Computing Foundation (CNCF) | Kubernetes Community Contributor

2019 - Present

- Contributed 15+ PRs to Kubernetes core networking and storage subsystems, with 8 merged contributions adopted in v1.24 and v1.25 releases
- Organized quarterly CNCF Kubernetes workshops in Seattle, attracting 200+ attendees and establishing local community chapter with 800+ members

DevOps Institute | Certified Kubernetes Administrator (CKA) Mentor

2020 - Present

- Mentored 30+ engineers through CKA certification program, achieving 92% first-attempt pass rate compared to industry average of 65%
- Created comprehensive Kubernetes troubleshooting course adopted by 5 enterprise organizations

TECHNICAL SKILLS

Languages – Python, Bash, Go, YAML, HCL, SQL

Technologies – Kubernetes, Docker, Terraform, Ansible, AWS (EC2, ECS, Lambda, RDS), GCP (GKE, Cloud Run), Azure (AKS), Prometheus, Grafana, ELK Stack, Vault, ArgoCD

Tools – Jenkins, GitLab CI/CD, GitHub Actions, CloudFormation, Helm, Datadog, PagerDuty, Consul, etcd, Kafka, RabbitMQ
