EDUCATION

- University of Cambridge** | *MSc Computer Science* 2009 - 2011
- Graduated with Distinction; thesis on optimizing client-side rendering pipelines received departmental recognition
 - Led the Computer Science Society as President, organizing weekly technical seminars attended by 150+ members
- University of Manchester** | *BSc Computer Science (First Class Honours)* 2005 - 2009
- Achieved top 5% of cohort; awarded Computer Science Prize for academic excellence
 - Founded the Web Development Club, growing membership from 12 to 120+ active students in 2 years

EXPERIENCE

- Stripe** | *Principal Frontend Engineer* 2021 - Present
- Led architectural redesign of Stripe Dashboard resulting in 45% reduction in page load times and enabling 8 million+ monthly active users
 - Established frontend excellence standards across 40+ engineers, reducing production incidents by 62% YoY through code review frameworks and testing protocols
 - Mentored 12 senior engineers through architectural decision-making, with 3 promoted to staff-level positions within 18 months
- Figma** | *Senior Staff Frontend Engineer* 2018 - 2021
- Architected real-time collaborative editor performance layer, enabling simultaneous editing for 50,000+ users with <200ms latency
 - Drove migration of 2.5M lines of legacy code from Coffeescript to TypeScript, improving type safety and reducing bugs by 58%
 - Implemented advanced caching and incremental rendering system that decreased bundle size by 34% and improved Time to Interactive by 3.2 seconds
- Datadog** | *Staff Frontend Engineer* 2015 - 2018
- Designed and built observability dashboard platform handling 12 trillion data points monthly with sub-100ms query response times
 - Scaled frontend team from 6 to 24 engineers by establishing mentorship program and technical standards, increasing delivery velocity by 180%
 - Pioneered WebWorker-based performance optimization, reducing main thread blocking by 71% and improving user satisfaction scores by 42%
- Palantir Technologies** | *Senior Frontend Engineer* 2012 - 2015
- Engineered geospatial visualization layer supporting real-time analysis for 500+ enterprise customers, processing 2.5 petabytes of data
 - Led cross-functional initiative to implement accessibility standards (WCAG 2.1 AA), increasing user base by 28% among accessibility-dependent users
 - Developed reactive state management framework adopted across 15+ product teams, reducing development time by 35% and cutting runtime memory usage by 44%
- ThoughtWorks** | *Senior Consultant - Frontend Engineering* 2011 - 2012
- Architected responsive web application for leading financial services client, scaling from 100K to 2.3M daily active users within 8 months
 - Mentored team of 5 junior developers on modern JavaScript frameworks and test-driven development, improving code coverage from 18% to 88%
 - Pioneered continuous deployment pipeline that reduced release cycle from 3 weeks to 2 hours, enabling 150+ production deployments monthly

PROJECTS

- VectorFlow** | *TypeScript, WebGL, WebAssembly, React* 2020 - 2022
- Built open-source 2D/3D rendering engine for data visualization with 2.8K GitHub stars, achieving 60fps performance on 1M+ data points
 - Optimized WebAssembly bindings reducing initialization time from 850ms to 120ms, enabling instant interactive visualizations in production apps
- AccessibilityAI** | *React, Node.js, Machine Learning, ARIA* 2019 - Present
- Developed AI-powered accessibility testing framework that automatically detects WCAG 2.1 violations, adopted by 400+ organizations and scanning 50M+ web pages
 - Implemented automated remediation suggestions covering 87% of common accessibility issues, reducing manual testing time by 76% for enterprise clients

EXTRACURRICULAR

React Europe Conference | *Speaker & Program Committee Member*

2018 - Present

- Delivered keynote talks reaching 3,000+ attendees on scaling frontend architecture at hypergrowth companies, generating 200K+ views on YouTube
- Curated technical track attracting top 5% of submission proposals, improving conference quality score from 4.2 to 4.8 out of 5 stars

Open Source Frontend Community | *Core Contributor & Maintainer*

2015 - Present

- Maintain 4 high-impact open-source projects with combined 45K+ GitHub stars, averaging 30+ pull requests merged monthly and mentoring 25+ contributors
- Established contributor covenant and onboarding documentation, increasing new contributor retention rate from 22% to 71% over 3 years

TECHNICAL SKILLS

Languages – TypeScript, JavaScript (ES6+), Python, SQL, HTML5, CSS3, WebAssembly

Technologies – React, Vue.js, Next.js, GraphQL, WebGL, Three.js, Node.js, Redux, Webpack, Vite, Testing Library, Jest, Cypress, WebSockets, Service Workers

Tools – Git, GitHub, GitLab, VS Code, Chrome DevTools, Lighthouse, Figma, Jira, Docker, AWS (S3, CloudFront, Lambda), Datadog, Sentry
