EDUCATION

- University of Amsterdam**, *Master of Science in Technical Communication* 2011 - 2013
- Thesis: Localization patterns for API documentation in polyglot microservices environments
- Universiteit Utrecht**, *Bachelor of Arts in Communication Studies* 2008 - 2011

EXPERIENCE

- Stripe**, *Staff Technical Writer, Developer Platform* June 2021 - Present
- Architected and shipped comprehensive documentation strategy for 8 new payment APIs, resulting in 47% reduction in API integration time for developer onboarding across 2,400+ implementation partners.
 - Led cross-functional documentation governance initiative spanning 5 engineering teams, establishing standardized OpenAPI schemas and automated doc generation pipeline that decreased content review cycle from 14 days to 3 days.
 - Mentored 4 junior technical writers and 2 documentation engineers on developer-first content patterns, elevating team documentation quality scores from 72% to 91% on developer satisfaction surveys.
- Datadog**, *Senior Technical Writer, Developer Experience* March 2018 - May 2021
- Owned end-to-end documentation for Datadog Observability SDK suite (12 language bindings), authoring 340+ integration guides and reducing support ticket volume by 31% through proactive troubleshooting docs.
 - Pioneered interactive code samples framework using Docusaurus MDX, enabling 85+ runnable examples across CLI, REST, and gRPC documentation; tracked 2.3M+ views month-over-month.
 - Championed developer feedback loop by implementing in-doc analytics and user surveys, driving 3 major UX improvements to API reference pages that increased click-through rates by 56%.
- Twilio**, *Lead Technical Writer* September 2015 - February 2018
- Managed documentation portfolio for Communications APIs (voice, SMS, video, messaging) covering 10+ SDK languages, supporting 150,000+ active developers and maintaining 99.2% documentation uptime.
 - Designed and executed technical writer onboarding program for 6 new hires, creating 180-minute bootcamp modules on API design patterns and async documentation workflows, reducing time-to-productivity by 8 weeks.
 - Collaborated with product and engineering leads to establish API versioning documentation standard, eliminating 6 months of technical debt and enabling seamless transitions for 40,000+ customers across 3 major release cycles.
- JetBrains**, *Technical Writer, Developer Tools* June 2013 - August 2015
- Created 65+ technical guides and API reference documentation for IntelliJ IDE plugin development ecosystem, reaching 120,000+ monthly active plugin developers and ranking in top 3 JetBrains documentation sets by engagement.
 - Reduced average plugin developer onboarding time from 6 weeks to 2.5 weeks through streamlined architectural documentation and 12 step-by-step quickstart tutorials covering plugin SDK, build systems, and testing frameworks.

PROJECTS

- Developer Documentation Governance Framework**, *OpenAPI 3.0, Spectacle, GitHub Actions, Python, Markdown* 2022 - 2023
- Designed and implemented organization-wide documentation standards framework adopted by 12 teams, standardizing 240+ API specifications and reducing inconsistencies by 89%.
 - Built automated validation pipeline using GitHub Actions that enforced schema compliance and generated 15+ analytics dashboards tracking documentation quality metrics across 5 service domains.

EXTRACURRICULAR

- Write the Docs**, *Community Moderator & Conference Speaker* 2019 - Present
- Moderated 8+ Slack discussions on API documentation best practices with 4,200+ member community, influencing documentation strategies at organizations including GitHub, Shopify, and Twilio.
 - Delivered keynote talk 'Scaling Developer Documentation Across Polyglot Teams' at Write the Docs Prague 2023, reaching 380+ attendees with 4.8/5 satisfaction rating.
- Developer Documentation Special Interest Group (SIG)**, *Working Group Lead* 2021 - Present
- Founded and chaired quarterly working group of 25+ technical writers from Fortune 500 tech companies, co-authoring 3 published whitepapers on API documentation accessibility and developer onboarding metrics.
 - Established 'Developer Docs Maturity Model' framework adopted by 40+ organizations globally, generating 12,000+ downloads on GitHub over 2 years.

TECHNICAL SKILLS

Languages: English (Fluent), Dutch (Native), German (Intermediate)
Technologies: API Documentation, OpenAPI/Swagger, GraphQL, REST, Protocol Buffers, gRPC, Kubernetes, Docker, CI/CD Pipelines

Tools: Hydrogen (Shopify), Docusaurus, MkDocs, Sphinx, Hugo, Figma, Postman, Insomnia, Git, GitHub Pages, Confluence, Jira, LaTeX
