

Prism UI Labs

Building the future of accessible, high-performance web experiences

Now Hiring: Manager, Frontend Engineering

San Francisco, CA (Hybrid) · Full-time · \$210,000 - \$270,000 USD

We're seeking an experienced Manager of Frontend Engineering to lead and grow our frontend team. You'll oversee a team of 5-8 talented engineers, guide architectural decisions, and drive the technical vision for our React-based design system platform. In this role, you'll balance hands-on technical contributions with people leadership, mentoring, and strategic planning. Ideal candidates bring 6+ years of experience including significant people management, strong expertise in modern frontend technologies, and a proven track record of building high-performing teams.

ABOUT US

Prism UI Labs is a forward-thinking SaaS company specializing in design systems and component libraries for enterprise applications. We serve Fortune 500 companies and innovative startups alike, providing the infrastructure needed to build scalable, accessible web interfaces. Our team is passionate about performance optimization, accessibility standards, and developer experience.

YOUR ROLE

- Lead, mentor, and develop a team of 5-8 frontend engineers, conducting regular 1-on-1s, performance reviews, and career development planning
- Design and implement team technical roadmap, prioritizing feature development, refactoring efforts, and performance optimization initiatives across React and Next.js applications
- Architect scalable frontend solutions for complex UI challenges, establishing best practices for TypeScript, accessibility (WCAG 2.1), and web performance standards
- Oversee code quality and engineering standards, reviewing architecture decisions and ensuring team follows established patterns for component development with React and Tailwind CSS
- Collaborate with product, design, and backend teams to define requirements and deliver customer-facing features; represent the frontend team in cross-functional planning
- Manage hiring and onboarding for the frontend team, defining skill requirements and conducting technical interviews for React and TypeScript expertise
- Champion web performance and accessibility initiatives, implementing automated testing with tools like Lighthouse CI and accessibility linting across the codebase

- Contribute hands-on technical work on high-impact projects, particularly in areas requiring architectural expertise (e.g., design system evolution, build optimization with Vite)
- Drive knowledge sharing through tech talks, documentation, and mentoring on advanced frontend concepts like concurrent rendering, component composition, and performance profiling

REQUIRED QUALIFICATIONS

- 6+ years of professional frontend development experience, with at least 2+ years in a people management or technical leadership role
- Expert-level proficiency in React and TypeScript, with strong understanding of component patterns, hooks, and state management
- Demonstrated experience building or maintaining large-scale design systems or component libraries
- Deep knowledge of web performance optimization techniques and familiarity with tools like Webpack and Vite for build optimization
- Strong commitment to web accessibility standards (WCAG 2.1) with experience implementing and testing accessible components
- Proven track record of successfully hiring, mentoring, and growing engineering teams; experience with performance reviews and career development
- Excellent communication skills and ability to influence cross-functional stakeholders without formal authority

DESIRED QUALIFICATIONS

- Experience with Next.js and server-side rendering optimization
- Background in mentoring junior/mid-level engineers or leading technical initiatives from conception to delivery
- Familiarity with modern CSS frameworks like Tailwind CSS and CSS-in-JS solutions
- Experience with frontend testing frameworks and testing best practices (Vitest, Testing Library, Playwright)
- Background in open-source contribution or community engagement within the frontend ecosystem

TOOLS OF THE TRADE

React, TypeScript, Next.js, Tailwind CSS, Vite, Webpack, WCAG 2.1 Accessibility Standards, Web Performance APIs & Lighthouse, Testing Library & Vitest, Storybook

WE OFFER

- Competitive salary and equity package with annual bonus
- Comprehensive health insurance (medical, dental, vision) with company coverage
- Professional development budget (\$3,000/year) for courses, conferences, and certifications

- Flexible hybrid work model (3 days in-office, 2 days remote)
- Generous PTO policy (20 days) plus 10 company holidays
- Parental leave (12 weeks paid for primary caregiver, 4 weeks for secondary)
- Mental health support including subsidized therapy and wellness programs
- Home office stipend and equipment allowance

To Apply

Submit your resume, cover letter, and links to your work (GitHub profile, portfolio, or design system examples) via our careers page at prismuiabs.com/careers. Please include specific examples of teams you've led, technical initiatives you've driven, and your approach to mentoring engineers. We review applications on a rolling basis.
