

Lead Product Manager

Cortex Labs — Transforming customer insights into intelligent product decisions

Location	San Francisco, CA (Remote-first, onsite 2x per month)
Employment Type	Full-time
Compensation	\$175,000 - \$235,000 USD

The Opportunity

Join Cortex Labs as a Lead Product Manager to lead our Analytics Platform team and drive the vision for our core product offering. You'll manage a cross-functional team of 4-5 engineers, work closely with design and data teams, and own end-to-end strategy for a key product vertical. This is an ideal role for an experienced PM ready to develop product leadership skills while maintaining hands-on involvement with strategy, roadmap, and execution. You'll report to the VP of Product and work directly with executive stakeholders to define company-level product direction.

About Cortex Labs

Cortex Labs is a Series B SaaS company building AI-powered analytics and product intelligence platforms. We enable product teams at mid-market and enterprise companies to understand user behavior, prioritize features, and ship products faster. Founded in 2021, we're backed by top-tier investors and serve 200+ customers across fintech, health tech, and e-commerce. Our mission is to democratize advanced product analytics so every team can build with confidence.

Day-to-Day

- Lead and mentor a team of 4-5 engineers, conducting 1:1s, performance reviews, and fostering a culture of ownership and execution excellence
- Own the full product lifecycle for the Analytics Platform: define strategy, manage quarterly roadmaps, and align team to north star metrics using Amplitude and Mixpanel analytics
- Partner with design and engineering leads to scope features, evaluate trade-offs, and ship high-impact products on schedule
- Conduct SQL-based analysis of user behavior data in Postgres and Snowflake to uncover insights that drive product decisions
- Define and track OKRs for your product area; use cohort analysis, funnel metrics, and retention curves to validate product-market fit
- Manage stakeholder relationships across executive leadership, support, and customer success; communicate product strategy and progress monthly
- Identify and recruit top engineering talent for your team; build hiring scorecards and participate in technical interviews

- Drive process improvements across product planning, design sprints, and launch procedures; establish team norms for documentation and knowledge sharing
- Represent the product org in technical deep-dives; review architecture proposals and help engineering optimize for user experience and scalability

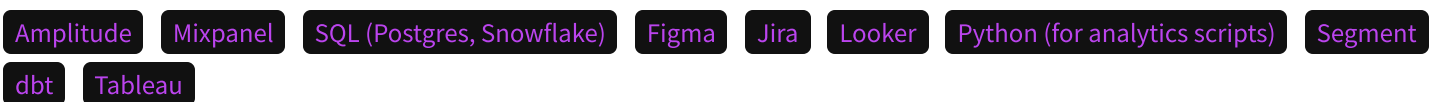

You Have

- 6+ years of product management experience, with at least 2 years leading or mentoring product and engineering teams
- Proven expertise in B2B SaaS, data/analytics products, or developer tools; ability to think like both a user and an engineer
- Strong SQL skills; comfortable writing and interpreting queries on large datasets to validate product hypotheses
- Hands-on experience with analytics platforms (Amplitude, Mixpanel, or similar) for defining metrics, building dashboards, and conducting user cohort analysis
- Track record of shipping 2+ major products or features end-to-end; ability to communicate product strategy clearly to engineers and stakeholders
- Experience building and managing cross-functional teams (engineering, design, data, support) in a fast-paced, iterative environment

Bonus

- Prior experience at a high-growth series B/C company or scaling to 100-500 employees
- Experience with technical product management for infrastructure, APIs, or backend systems
- Familiarity with modern product stack tools (Figma, Jira, Looker, dbt) and data governance practices
- Background in computer science, data science, or similar technical field, or self-taught technical product expertise

Our Stack

What We Offer

- Competitive equity package (0.25%-0.5% depending on experience)
- Medical, dental, vision, and mental health coverage (100% employee, 75% dependent)
- Unlimited PTO + 10 company holidays; parental leave (16 weeks primary, 12 weeks secondary)
- Commuter benefits, home office stipend (\$1,500 annually), and annual learning budget (\$2,500)
- Team offsites 2x per year in exciting locations; quarterly product engineering social events
- Inclusive benefits: fertility benefits, gender-affirming care, adoption assistance, and dependent care FSA

- 401k with 4% company match, life insurance (3x salary), and short/long-term disability

Apply

Apply directly via our careers page at careers.cortexlabs.io/lead-pm, or reach out to our VP of Product, Alex Chen, at alex@cortexlabs.io. Please include a resume, cover letter, and 1-2 examples of products you've shipped (links or descriptions) that showcase your impact. We review applications on a rolling basis and move quickly for strong candidates. Candidates will participate in a 4-stage interview process: 30-min screen with recruiter, 45-min PM screen (strategy case), 90-min take-home assignment (product critique), and executive round with VP of Product and CEO.
