

Prism Labs

Building intuitive interfaces that connect people to information.

Now Hiring: Staff UX Designer

San Francisco, CA (Remote-friendly) · Full-time · \$220,000 - \$290,000 per year

We're seeking an experienced Staff UX Designer to lead design strategy and technical execution across our product ecosystem. In this role, you'll mentor junior designers, establish design systems and standards, drive cross-functional collaboration with engineering and product leadership, and own the user experience for multiple high-impact initiatives. This is a technical leadership position for someone with 8+ years of proven design excellence and a demonstrated ability to influence product direction at scale.

ABOUT US

Prism Labs is a venture-backed design and technology company focused on creating innovative digital products for enterprise and consumer markets. Founded in 2018, we specialize in developing accessible, data-driven user experiences that help teams collaborate more effectively. Our platform is used by over 50,000 professionals across healthcare, finance, and education sectors.

YOUR ROLE

- Lead the evolution and maintenance of our comprehensive design system, ensuring consistency, accessibility compliance (WCAG AA/AAA standards), and scalability across all product surfaces using Figma as the single source of truth
- Conduct and synthesize user research using mixed-methods approaches (interviews, usability testing, analytics) to inform strategic product decisions and validate design hypotheses at the staff level
- Mentor and develop junior and mid-level UX designers, providing feedback, career guidance, and technical skill-building in prototyping tools, design systems, and accessibility best practices
- Establish design standards, component libraries, and documentation practices that empower cross-functional teams to ship high-quality experiences independently
- Partner with engineering and product leaders to advocate for user-centered design in technical architecture decisions and prioritize accessibility as a core feature, not an afterthought
- Prototype and validate complex interactions using Figma prototyping, Axure RP, or similar tools to communicate designs with precision and test edge cases before development
- Lead accessibility audits using tools like WAVE and Axe, working with developers to resolve WCAG violations and establish accessibility-first design practices across the organization

- Champion design thinking and user-centered methodologies across product and engineering teams through workshops, case studies, and cross-functional leadership
- Contribute to hiring and evaluation of design talent, setting technical bar and cultural fit expectations for the team

REQUIRED QUALIFICATIONS

- 8+ years of professional UX/UI design experience in digital product design, with at least 3 years in a senior or lead role driving design systems, mentorship, or cross-team initiatives
- Expert-level proficiency with Figma, including components, variables, prototyping, design systems, and team collaboration workflows
- Demonstrated expertise in user research methodologies (qualitative and quantitative) and ability to synthesize insights into actionable design direction
- Strong portfolio showcasing complex, scalable design systems and accessibility-compliant interfaces; evidence of designing for diverse user needs and contexts
- Proven track record of successfully mentoring designers and raising the design craft within organizations; comfort with giving and receiving critical feedback
- Deep knowledge of accessibility standards (WCAG 2.1 AA minimum) and hands-on experience auditing and improving accessible design using tools like WAVE, Axe, or similar
- Excellent communication and presentation skills; ability to influence stakeholders and articulate design rationale to both technical and non-technical audiences

DESIRED QUALIFICATIONS

- Experience designing for or managing products in regulated industries (healthcare, finance) with complex compliance requirements
- Proficiency in one or more prototyping tools beyond Figma (Axure RP, Framer, or similar) to demonstrate advanced interaction design capability
- Hands-on experience with front-end code (HTML, CSS, or React) or demonstrated collaboration patterns with engineers in design-to-dev handoff workflows
- Experience with design tokens, CSS-in-JS, or other design-engineering integration frameworks
- Published writing, speaking, or workshop facilitation on design systems, accessibility, or UX strategy in professional contexts

TOOLS OF THE TRADE

Figma, Design Systems & Component Libraries, User Research & Analytics, Prototyping (Axure RP, interactive Figma prototypes), Accessibility Auditing (WAVE, Axe, Lighthouse), WCAG 2.1 Compliance Standards, Design Tokens & CSS-in-JS Integration, Usability Testing Platforms (UserTesting, Maze), Interaction Design & Microinteractions, Design Documentation & Knowledge Management (Notion, Confluence)

WE OFFER

- Competitive equity package and annual bonus (15% target)
- Medical, dental, and vision insurance with 90% employer coverage for employee plans
- Flexible work-from-home policy with optional San Francisco office space
- Professional development budget (\$5,000 annually) for courses, conferences, and design tools
- \$10,000 annual wellness stipend (gym membership, mental health, wellness retreats)
- Generous PTO policy: 25 days paid time off plus 10 company holidays
- Parental leave (16 weeks paid for primary caregiver, 12 weeks for secondary)
- Design tool subscriptions (Figma, Adobe Creative Suite, Axure, prototyping tools) provided by company

TO APPLY

Submit your application at careers.prismlabs.io/staff-ux-designer. Include your resume, a portfolio link (Figma showcase or case study website preferred), and a 1-2 page cover letter describing your approach to design systems or mentorship. Candidates will be screened for portfolio quality and staff-level design thinking. We review applications on a rolling basis.
