

Bob Gem

Software Engineer & Builder

✉ bob.gem@example.com 📱 +447783444288 [in/BobGem](#) [github](#)

Computer science graduate with solid foundation in full-stack development and systems programming. Proficient across multiple modern languages and frameworks including Python, C++, Java, and Flutter. Demonstrates capability in building scalable applications utilising cloud infrastructure and computer vision technologies.

Side Projects

django-rest-framework-contrib —

Python · personal repo

- Small collection of helper utilities I keep around for my own Django side projects, mostly tweaks to serializers and viewsets.
- Mainly maintained on weekends; occasional contributions from a handful of other people.

react-distributed-state —

TypeScript · personal repo

- Personal experiment exploring how to share React component state across browser tabs using broadcast channels.
- Started as a learning exercise to dig into React internals; kept it on GitHub for my own reference.

Education

Imperial College London — 2022 – 2026

Manchester, UK

Relevant modules: Introduction to Machine Learning — Jul 2015 – Aug 2019

Birmingham, UK

Skills
