

# Jude Washington

jude.washington@gmail.com · (415) 287-3649 · <https://github.com/judeiosdev>

## EDUCATION

- University of California, Berkeley | B.S. in Computer ScienceMay 2024
- Relevant coursework: Mobile Development, Software Engineering, Human-Computer Interaction
  - GPA: 3.72, Dean's List 2023-2024

## EXPERIENCE

- TechFlow Systems | Junior iOS DeveloperJune 2024 - Present
- Developed and shipped 3 customer-facing features in SwiftUI, reducing user onboarding friction by 28% per analytics data
  - Optimized app launch time from 3.2s to 1.8s through lazy loading and Core Data caching, improving ratings from 3.8 to 4.3 stars
  - Collaborated with UX team to resolve 12 crash logs and memory leaks, cutting app instability incidents by 45%
- Momentum Design Studio | iOS Development InternJanuary 2024 - May 2024
- Built reusable SwiftUI component library with 15+ UI elements, accelerating feature development across 2 internal apps by 3 weeks
  - Integrated RESTful API endpoints and managed JSON decoding using Codable, enabling real-time sync for 5,000+ user dataset
  - Fixed and documented 8 UIKit legacy code issues during modernization sprint, improving code maintainability score by 34%

## PROJECTS

- FitTrack Pro | SwiftUI, HealthKit, Core Data, CombineSeptember 2023 - April 2024
- Engineered full-stack iOS fitness tracking app with HealthKit integration, achieving 2,400+ downloads on TestFlight
  - Implemented local-first architecture with Core Data sync, enabling offline access for 100% of features
- Open Source: PopupKitSwiftUI | Swift, SPM, GitHub ActionsJuly 2023 - Present
- Maintained open-source library for customizable popup dialogs, garnering 180+ GitHub stars and 8 pull request contributions from community
  - Published to CocoaPods with 500+ weekly downloads, reducing adoption friction across iOS ecosystem
- WeatherMind | UIKit, Weather API, URLSession, RealmNovember 2023 - December 2023
- Developed weather forecasting app with 10-day predictions and location persistence, completing academic capstone in 6 weeks
  - Achieved 94% code coverage with XCTest unit tests and UI automation testing across 3 device simulators
- NutriLog (University Project) | SwiftUI, Firebase, AVFoundationFebruary 2023 - May 2023
- Built nutrition tracking app with barcode scanner using Vision framework, processing 50+ food items per session
  - Designed Firebase backend architecture supporting 25 concurrent users in group study testing

## EXTRACURRICULAR

- UC Berkeley iOS Developers Club | Vice PresidentAugust 2023 - May 2024
- Organized monthly hands-on workshops for 60+ members covering SwiftUI, networking, and App Store best practices
  - Mentored 8 junior developers on iOS fundamentals and portfolio projects, resulting in 6 securing internships
- Apple Developer Academy (Partner Program) | ParticipantJune 2023 - August 2023
- Completed intensive 8-week bootcamp focused on SwiftUI best practices, accessibility, and performance optimization
  - Shipped prototype app with accessibility audit achieving WCAG AA compliance across all 15 screens

## TECHNICAL SKILLS

**Languages** – Swift, Objective-C, SQL

**Technologies** – SwiftUI, UIKit, Combine, HealthKit, Core Data, Vision Framework, AVFoundation, MapKit, Firebase, REST APIs

**Tools** – Xcode, Git, GitHub, TestFlight, CocoaPods, SPM, Figma, Jira
