EDUCATION

UC Berkeley | B.S. Statistics & Computer Science

May 2023

- Completed coursework in Machine Learning, Statistical Inference, and Distributed Systems; GPA: 3.7
- Capstone: Built recommendation engine analyzing 2.1M user interactions across e-commerce platform using collaborative filtering

EXPERIENCE

Stripe | Data Science Intern

June 2023 - August 2023

- Developed a fraud detection model using LightGBM that reduced false positives by 22% while maintaining 98% true positive rate, impacting 50K+ daily transactions
- Built automated ETL pipeline in Airflow to ingest and validate payment data from 3 disparate sources, reducing manual data preparation time by 35 hours/week
- Collaborated with cross-functional teams to deliver A/B testing framework that analyzed 12 product experiments and informed roadmap prioritization

DataRobot | Junior Data Scientist

September 2023 - Present

- Engineered 18 novel features for enterprise customer churn prediction model, achieving 0.84 AUC and enabling 8% improvement in model accuracy
- Automated weekly reporting dashboard using Python and Tableau that tracks 25+ KPIs across 15 client segments, reducing manual report generation by 12 hours
- Deployed 3 production ML models using Docker and AWS SageMaker, implementing real-time monitoring that flagged 6 data drift incidents before impacting predictions

PROJECTS

Customer Lifetime Value Prediction | Python, scikit-learn, Pandas, PostgreSQL

January 2023 - March 2023

- Constructed regression model predicting customer CLV within $\pm\$50$ range for 100K subscription customers using 15 engineered behavioral features
- Implemented hyperparameter tuning with GridSearch and cross-validation, improving RMSE by 28% from baseline model

COVID-19 Sentiment Analysis (Open Source Contribution) | Python, NLTK, spaCy, Matplotlib, GitHub

August 2022 - October 2022

- Contributed NLP preprocessing module to open-source project analyzing 50K+ Twitter posts about pandemic, merged 2 pull requests
- Optimized text tokenization pipeline to process 1M documents in <4 minutes (3x faster than original implementation)

Time Series Forecasting: Stock Market Analysis | Python, ARIMA, Prophet, TensorFlow LSTM, Matplotlib

April 2023 - May 2023

- Trained ensemble model combining ARIMA, Prophet, and LSTM networks to forecast S&P 500 closing prices with 92% directional accuracy
- Generated comprehensive analysis report with 8 visualizations and backtested strategy achieving 14% annual return

Exploratory Data Analysis: Kaggle Housing Competition | Python, Pandas, Seaborn, scikit-learn, Kaggle

February 2023 - March 2023

- Analyzed 1,460 housing records and engineered 12 features addressing multicollinearity, ranked in top 18% of competition (2,400+ participants)
- Created 15 publication-quality visualizations revealing 5 key price drivers, achieving final RMSE of 0.125

EXTRACURRICULAR

Berkeley Data Science Student Association | Member & Workshop Volunteer

2021 - 2023

- Led 3 hands-on workshops teaching 60+ students practical ML workflows with real datasets
- Mentored 5 first-year students transitioning into data science career path

Women in Data Science (WiDS) | Community Participant & Hackathon Winner

2022 - Present

- Placed 2nd in 2023 WiDS Datathon (300+ teams globally) building classification model for healthcare equity
- Actively networked with 100+ professionals through monthly meetups and mentorship events

TECHNICAL SKILLS

Languages – Python (Advanced), SQL (Advanced), R (Intermediate)

Technologies – Python, SQL, scikit-learn, TensorFlow, XGBoost, Pandas, NumPy
Tools – Jupyter, Git, AWS (EC2, S3, SageMaker), Docker, Airflow, Tableau, DBeaver
